ABOUT ME

Dedicated DevOps Engineer with a proven track record of enhancing system monitoring and alerting capabilities through the implementation of tools like Prometheus and Grafana. My expertise lies in automating backend processes and routine tasks using Python, Shell, and Powershell, resulting in improved efficiency. I bring in-depth knowledge of MS SQL Server DBA, Jenkins, Azure DevOps and AWS, complemented by strong skills in Docker, Kubernetes, Ansible, and Terraform, with a continuous learning mindset.

EDUCATION

Bachelor of Technology 2019-2023
Raj Kumar Goel Insititute of Technology, Ghaziabad, India
✓ GPA: 8.2/10.0

SKILLS

Technical Skills

- | | | |
|----------------|--------------|-------------------|
| • Azure Devops | • Kubernetes | • Terraform |
| • Docker | • Scripting | • MS SQL |
| • AWS | • Git | • Ansible |
| • Jenkins | • prometheus | • VSCode |
| • python | • Grafana | • Linux / Windows |

EXPERIENCE

DevOps Engineer July 2023 - Present
World Fashion Exchange, Gurugram, India

- Automated deployments using Python and PowerShell, reducing deployment time significantly.
- Developed CI/CD pipeline with Jenkins to enhance system reliability.
- Implemented Git version control and branching strategies using an on-prem Azure DevOps Server.
- Built AWS CloudWatch dashboards to monitor system performance.
- Automated server provisioning and configuration for faster, easier maintenance.
- Deployed scalable, high-performance servers on AWS.

PROJECTS

ERP and PLM Configuration Automation - WFX (Jan 2024 - Present)

- Technologies: Python, PowerShell, Jenkins, AWS (EC2, S3) .
- Led the automation of ERP and PLM configuration processes using Python and PowerShell scripts, integrated with Jenkins for CI/CD.
- Responsibilities included creating and deploying server patches, automating server configurations, and managing backup systems via Amazon S3.

Azure DevOps Server CI/CD Pipeline and Git Migration - WFX (Oct 2024 - Present)

- Technologies: Azure DevOps Server, Git, Bonobo Git Server, YAML pipelines.
- Spearheaded the deployment of an in-house Azure DevOps Server for source control, branching, and CI/CD automation.
- Migrated Git repositories from Bonobo Git Server to Azure DevOps, streamlining version control and pipeline execution across development teams.

Containerization and Load Balancing of ERP/PLM Applications - WFX (Jan 2025 - Present)

- Technologies: Docker, Kubernetes, Ansible, EKS
- Ongoing research and proof-of-concept development for containerizing legacy ERP and PLM systems using Docker and Kubernetes.
- Focused on implementing Kubernetes-based load balancing strategies to optimize resource usage and application availability.
- Also developed Ansible playbooks for consistent configuration management across distributed environments.

Real - Time Monitoring with Prometheus, Grafana , AWS CloudWatch - WFX (Oct 2023 - Jan 2024)

- Technologies: Prometheus, Grafana, AWS CloudWatch, Node Exporter, EC2
- Implemented a centralized monitoring stack using Prometheus and Grafana for real-time performance tracking, log analysis, and system metrics visualization.
- Integrated AWS CloudWatch to enhance monitoring of EC2 instances and deployed exporters for application-specific telemetry.

In - House E - Learning Platform Deployment Using Moodle - WFX (Apr 2024 - Dec 2024)

- Technologies: Moodle ,MySQL ,PHP ,Apache .
- Set up an internal Moodle-based e-learning system to deliver technical and onboarding training to employees.
- Customized features for assessments, quizzes, certification, and performance tracking.
- The platform improved training consistency and allowed management to monitor learning outcomes and employee progress effectively.

CERTIFICATIONS

- ✓ Hybrid Multi cloud
- ✓ RedHat Enterprise Linux Automation with Ansible (RH294)
